

ADP ALLOCATION METHODOLOGY: CURRENT AND HISTORICAL PRACTICES

FY 1996-97

ADDENDUM

This addendum contains only funding additions that occurred after March 1, 1997 in FY 1996-1997.

V - SAFE AND DRUG-FREE SCHOOLS AND COMMUNITIES GRANT (SDFSC):

California Mentor Initiative

The California Mentor Initiative (CMI) was created to address the effects of alcohol and drug use, teen pregnancy, educational failure, and violence on the youth of California. Funds to support local mentoring programs were made available to counties through a Request for Application (RFA) process. These funds support mentoring activities as an alcohol and drug prevention strategy. It is the intent of the Department to expand mentoring services that reach at-risk youth not currently served within the State=s educational system. The Department=s support for local programs under the CMI started in FY 1996-1997 and is proposed to sunset in FY 2000-01.

- Minimum Based Allocation (MBA) counties were eligible to apply for \$10,000, and all other counties were eligible to apply for \$50,000 with the following exceptions:

Los Angeles, San Diego, and Orange counties were eligible for larger awards due to the exceptionally large populations; Los Angeles County was eligible for up to five \$50,000 grants; and San Diego and Orange Counties were eligible for up to two \$50,000 grants. Therefore, the maximum allocations available to these counties over the five year period: Los Angeles, \$250,000;

Orange, \$100,000; and San Diego - \$100,000.

Since Sutter and Yuba counties are considered a single non-MBA county, they were eligible for \$50,000. Nevada and Mendocino counties were also eligible for \$50,000 each.

- Eight non-MBA counties were allocated \$50,000 each, Los Angeles County was allocated \$100,000.
